The Well-Being Index™: What Is Wellbeing?

CAREER

Liking what you do each day and being motivated to achieve your goals

SOCIAL

Having supportive relationships and love in your life

FINANCIAL

Managing your economic life to reduce stress and increase security

COMMUNITY

Liking where you live, feeling safe and having pride in your community

PHYSICAL

Having good health and enough energy to get things done daily

- High wellbeing means ***a life well-lived*** — all the things that are important to each of us, what we think about and how we experience our lives.
- Wellbeing is comprised of five interrelated and complementary elements.

Overview of Main Findings

- The Well-Being Index score for the Beach Cities is now at 69.5, its highest recorded level.
 - Manhattan Beach's WBI score of 71.6 is the highest ever recorded nationally.
- The Beach Cities has built on wellbeing gains measured from 2010-2015, with improvements in all five elements and the WBI score since 2015 amid declines nationally.
 - All three communities have improved since 2015 (the first measurement year under the new five-element model).
 - Financial and community wellbeing, followed by physical and social wellbeing, have shown the best improvement at the element level.
- Modest improvements since the 2023 measurement period are in line with U.S. changes.
- Excellent wellbeing across many metrics, led by reports of “city or area is the perfect place for you” (79% agreement) and “proud of community” (76% agreement). Impactful volunteerism is also excellent.
- Exercise rate, product consumption, and active, natural movement are all excellent. Smoking (4.8%) is half the U.S. rate.

Overview of Main Findings

- Familiarity with BZP reaches all-time high of 50%. Engagement in BZP work holds steady at 10% of the adult population.
- Perceptions of positive impact of the BZP work on individual wellbeing remains the same at 12%, but community impact drops to 11%.
- Mental health rated “excellent” by 36% and “fair” or “poor” by 13% of respondents in the Beach Cities, unchanged since 2023.
- Roughly one in six (17%) of area residents report little or no connection to other people, unchanged from 2023.
- Daily loneliness remains lower in the Beach Cities (12%) than the U.S. (19%).
- One-half (51%) of Beach Cities residents report concerns over incivility, lower than national levels (66%).
- Alcohol consumption in the Beach Cities is somewhat lower in 2025 than 2023 but continues to run higher than the U.S.
- In the Beach Cities, 15% of residents have used cannabis products in the last month compared to 19% nationally.

Beach Cities: Well-Being Index and Overall Element Scores Remain Very High

Manhattan tips the scales with a WBI score of 71.6, the highest community WBI measurement ever recorded.

	U.S. Total	Census Pacific Division	Beach Cities Total	Redondo Beach	Manhattan Beach	Hermosa Beach
Well-Being Index	60.1	59.7	69.5	68.3	71.6	70.2
Career	56.7	55.1	62.8	62.0	64.4	62.8
Social	58.1	57.8	65.9	65.0	67.1	67.3
Financial	62.6	61.8	74.5	71.9	80.5	74.2
Physical	58.1	58.4	69.3	68.3	70.9	70.7
Community	60.7	60.3	72.3	71.3	74.7	72.4

Note: **Blue** and **orange** shading indicates statistically **better** or **worse** than the U.S. ($p < .05$). No shading means the estimate is statistically equal to the U.S. U.S. Source: Gallup, Aug. 28-Sept. 7, 2025 (n=5,644, Pacific Division n=795); These results reflect updated syntax for the overall WBI score for both years.

The Overall Well-Being Index Score Has Improved Across All Three Beach Cities Communities Since 2015 Amid a 1.6 Point Decline to 60.1 Nationally

Despite Very High Overall Wellbeing, the WBI Score Continues to Edge Up

	2025	2023*	Change Since 2023
Beach Cities Total	69.5	68.8	+0.7
Redondo Beach	68.3	67.4	+0.9
Manhattan Beach	71.6	71.2	+0.4
Hermosa Beach	70.2	70.2	+0.0

* WBI score has been updated since original publication in 2023 to correct for the omission of a question item in the scoring syntax..

Better since 2023:

- Exercise
- Dentistry
- Reaching goals
- Pride in community

Worse since 2023:

- Cholesterol rate
- Self-assessment of physical health

Biggest Opportunity Areas:

- Leadership creating enthusiasm for the future
- High cholesterol management
- Stress management

Since 2015, the Beach Cities Have Outperformed the U.S. in All Wellbeing Indicators

Improvement in the WBI and the five elements all exceed change over time nationally.

	Beach Cities (2025)	Beach Cities (2020)	Beach Cities (2015)	Beach Cities △ '15-'25*	U.S. (Q3 2025)	U.S. (Q3 2020)*	U.S. (2015)	U.S. △ '15-'25*
Well-Being Index	69.5	69.1*	65.9	+3.6	60.1	62.1*	61.7	-1.6
Career	62.8	61.0	60.6	+2.2	56.7	58.6	60.5	-3.8
Social	65.9	64.7	62.3	+3.6	58.1	59.1	61.1	-3.0
Financial	74.5	76.1	69.3	+5.2	62.6	64.1	60.8	+1.8

% Not at all familiar/DK	48	54	64	51	43	49

Mental Health Rated Fair or Poor By 13% of Adult Respondents in the Beach Cities, Unchanged Since 2023

Mental health is slightly lower among those with an income of less than \$120K a year (74% *very good + excellent*) and non-college graduates (76%) compared to the population (85%).

How would you describe your own mental health or emotional well-being at this time?

	U.S. Total	Beach Cities 2025	Beach Cities 2023	Redondo Beach 2025	Manhattan Beach 2025	Hermosa Beach 2025
Excellent	20%	36%	35%	34%	40%	33%
Good	56	50	51	48	50	57
Only fair	21	12	12	14	10	8
Poor	3	1	2	2	0	2

U.S. Source: Gallup, Dec. 2023 (n=6,386)

Roughly One in Six Area Residents Report Little or No Connection to Other People, Unchanged From 2023

Non-college graduates (79%) and those with an income under 120K a year (76%) are less likely to say they are very or fairly connected compared to their counterparts.

In general, how connected do you feel to people?

	U.S. Total	Beach Cities 2025	Beach Cities 2023	Redondo Beach 2025	Manhattan Beach 2025	Hermosa Beach 2025
Very connected	26%	37%	36%	36%	39%	39%
Fairly connected	48	46	47	44	50	45
A little connected	22	15	16	17	11	14
Not at all connected	3	2	2	2	<1	2

U.S. Source: Gallup, Dec. 2023 (n=6,386)

Daily Loneliness Remains Lower in the Beach Cities Than U.S.

Loneliness highest among those aged 18-49 nationally, but less so among their Beach Cities counterparts. Experiencing loneliness reduces the odds of feeling “very connected” to others by 76%.

Did you feel loneliness a lot of the day yesterday? (% yes)

U.S. Total 2025	Beach Cities 2025	Redondo Beach 2025	Manhattan Beach 2025	Hermosa Beach 2025
19%	12%	11%	12%	13%

3-9	5	6	6	3	7
10-29	4	3	3	2	5
30-31	6	2	3	<1	2

U.S. Source: Gallup, Dec. 2023 (n=6,386)

Final Thoughts: Very good baseline, but plenty of work to be done

- Excellent improvement over time defies the odds, outpacing the U.S. across most metrics.
 - Household income is the top predictor of wellbeing among individuals and large populations. But highly affluent communities are proven to not be more likely to *improve over time* than other communities – improvement comes from other factors.
- Improvement in exercise habits, eating habits, and BMI are all major success stories.
- Name awareness and favorability of the BCHD remains very strong and improving.
- Familiarity of BZP reaches record high.
- Concerns about incivility remain high but unchanged compared to 2023 and below national levels.
- Mental health and emotional wellbeing remains significantly better than what is found nationally, consistent with higher overall wellbeing.

Appendix

Beach Cities BZP: Evidence-Based Improvement Metrics (2025 Results)

	U.S. Total	Beach Cities Total	Redondo Beach	Manhattan Beach	Hermosa Beach
Well-Being Index Score	60.1	69.5	68.3	71.6	70.2

Engagement With Blue Zones Project Holds Steady at 10% of Total Population

Perceptions of individual impact are improved, while perceptions of community impact is reduced.

*Please indicate your **level of engagement** in the Blue Zones Project in your community. Would you say that you are highly engaged, somewhat engaged or not at all engaged in the project?*

*Using a five-point scale, where 5 means you strongly agree and 1 means you strongly disagree, how much do you agree or disagree that the Blue Zones Project has made a **positive impact on your life/community**?*

	Beach Cities Total 2025 (Of those who are familiar)	Beach Cities Total 2023 (Of those who are familiar)	Beach Cities Total 2020 (Of those who are familiar)	Beach Cities Total 2025 (Across all adults)	Beach Cities Total 2023 (Across all adults)	Beach Cities Total 2020 (Across all adults)
% Highly + Somewhat engaged in BZP	20	28	23	10	12	9
% Agree (%4+5) positive impact on life	28	27	19	12	12	7
% Agree (%4+5) positive impact on community	27	30	37	11	13	14
